• Web/App Development

• Relationship Management •  
Framework/Libraries: Express, React •  
Microsoft Office (Excel), G-Suite • Version  
Control Systems: Git GitHub •  
Mocha/Chai, Jest, Bootstrap, JQuery

### PROJECTS

#### TiTube - Tech stack: React, MaterialUI, RapidAPI, Youtube V3 API

TiTube uses Youtube V3 to allow users to access, search and watch any video of their choice on the app. It allows users to also see suggested and related videos. This app would in the future be updated to have features such as subscribing to pages, liking pages and leaving comments on videos.

#### Book'd Up - Tech stack: React, Express, Node.js, PostgreSQL, Google books API

Book'd Up is a collaborative project that was built to allow users to create, modify, and join book clubs. Book'd Up also provides a great feature called MatchBook. MatchBook is a feature that acts as tinder for book lovers. Books are recommended to the user and they are able to swipe right or left on the books based on their preference.

#### Scheduler App - Tech stack: Node.js, React, JavaScript, HTML/CSS, Jest, PostgreSQL, Express

Scheduler App is a react web app that takes in a client's request to schedule an interview with an interviewer. The client can edit, update or delete their scheduled interviews. The app also allows interviewers to show their availability and keep track of how many interviews they have each day.

#### VotrApp - Tech stack: Node.js, Express, JQuery, HTML & CSS, PostgreSQL

VotrApp is a collaborative project that allows a user to create a poll of activities on the web app. Once activity choices are submitted, the voting and result links are sent to the user to share with friends.
